## Announcements

### **Availability of meeting rooms**

The demand for meeting rooms is expected to exceed the capacity of the conference premises and priority will be given to meetings directly associated with the negotiating process. The secretariat appreciates participants' understanding in this connection. Meetings will therefore only be confirmed at the earliest one day prior to the requested meeting taking place.

### **Nizuc Media Centre**

The media centre for COP16/CMP6 is located at the Nizuc branch of the Moon Palace Hotel. Parties and observers are invited to bring to the Nizuc any press releases, publications or digital media for distribution to the media. A continuous shuttle bus operates from the lobby of Maya (Sunrise) to and from the Nizuc Media Centre.

Printed materials may be conveniently displayed on available shelving in the entrance lobby.

For more information telephone the COP16 media call centre number: +521 998 283 2144

### **Use of audio/video recording devices by participants at UNFCCC sessions**

The making of audio and video recordings, including any external transmission, by Party or observer organization delegations during open and closed official meetings and in designated security zones is not permitted. The secretariat provides audio recordings of official meetings, as required by Parties. Webcasts are provided for open plenary meetings.

### **Meditation room**

A room for meditation and prayer is available to participants and is located in Cancun Messe, Hall D, and also in the "Meditation Garden" which is located on the beach stretching between Maya (Sunrise) and Nizuc Media Center.

A special support area is available to participants who need a fixed Internet connection in order to upload multimedia content to the web, blogs and social networking sites. The "Blogger Loft" on the upper level of the Cancunmesse provides workspace, power and fixed Internet connections for a limited number. The Blogger's Loft is prioritized for those working with multimedia content. Participants needing only access to the Internet for email or office purposes should utilize the computer centres or wireless zones.

The Blogger's Loft is part of a pilot project by the UNFCCC secretariat with the United Nations Foundation that seeks to explore options for the participation of new "digital media" both physically and virtually in the UNFCCC process. During the Conference, all online media and bloggers using the Blogger's lounge will also be able to attend a series of interactive "digital media conversation" events to be held in the Desierto Press Conference Room in the Cancunmesse starting on Saturday, 4 December. Total carbon deposits per square kilometer in these coastal systems can be up to five times the carbon stored in tropical forests, resulting from sequestration rates up to 50 times that of tropical forests. Global degradation and loss of these coastal systems are estimated to be up to 2% per year. This not only results in the loss of important natural sequestration of atmospheric carbon but also in the rapid emission, within decades, of large carbon stores that build up over centuries to millennia. Currently no management or incentive systems specifically value the role of marine ecosystems in sequestering and storing greenhouse gases. Dr. Emily Pidgeon discusses the importance of blue carbon in relation to climate change.</p>	<p>Conservation International Katrin Olson kolson@conservation.org</p>	<p>Climate Change Studio (Cancunmesse Hall C)</p>

### Rio Conventions' Ecosystems and Climate Change Pavilion

The **Rio Conventions' Ecosystems and Climate Change Pavilion** is a collaborative outreach activity involving the Rio Convention secretariats, the Global Environment Facility and other important partners. In Cancun, the Ecosystems Pavilion will have a physical 'base' at Cancunmesse, but also has events at other locations, providing a diverse range of opportunities to discuss the linkages between biodiversity, climate change and sustainable land management.

During the course of COP 16/CMP 6, negotiators and other key decision-makers, scientists, and practitioners will be able to discuss the links between forest biodiversity and adaptation and mitigation; the role of oceans; indigenous peoples and communities, water, the role of protected areas, climate change biodiversity loss, desertification and land degradation, and financing. A full programme is available at <http://www.ecosystemspavilion.org/en/cancun>.
